SUMMARY

CS graduate with a Human-Computer Interaction concentration and a minor in Psychology, seeking entry-level software development or UX roles in the New River Valley area. Experienced in full-stack development (React, Python, Java, Swift), relational databases, and mobile-first UX design.

EDUCATION

University of North Carolina at Charlotte — Charlotte, NC

B.A. Computer Science, Concentration: Human-Computer Interaction | Minor: Psychology | GPA: 3.25 | May 2026

Relevant Coursework: Human-Computer Interaction, Software Engineering, Data Structures & Algorithms, Databases, Mobile Application Development, Psychology of Human Factors

TECHNICAL SKILLS

Languages: Java, Python, C/C++, Swift, Kotlin, HTML, CSS, JavaScript

Frameworks & Libraries: React, Next.js, Node.js, REST APIs

Databases & Cloud: Supabase (Auth + Postgres), MySQL, Vercel

Tools: Git/GitHub, Xcode, VS Code, Postman, Linux (Ubuntu), VirtualBox, Figma, Android Studio

Other: UX Research, Accessibility (WCAG), Statistical Modeling (BIQ Project)

PROJECTS

Whole Foods Case Study <https://itis-4390.vercel.app>

- Designed end-to-end order, cart, and user-account flows backed by Supabase Auth + Postgres, enabling real-time state management, purchase history, and delivery tracking.
- Led UX design for a mobile-first grocery experience, creating intuitive navigation, streamlined checkout interactions, and consistent component patterns to reduce cognitive load.

BIQ Basketball Intelligence App <https://github.com/DevinW2304/biq-frontend>

- Built a full-stack basketball analytics platform featuring a custom BIQ formula: a weighted metric combining points, assists, rebounds, and plus/minus to quantify player impact.
- Designed interactive dashboards, leaderboard views, and head-to-head comparison tools that utilize REST API integration and performance-focused frontend development.
- Created the backend data pipeline to ingest and normalize statistical data across multiple seasons, enabling reliable cross-year comparisons.

WORK EXPERIENCE

Grocery Associate | Food Lion June 2024 - Present | Charlotte, NC

- Observed shopper behaviors and pain points firsthand, informing a broader approach to user-centered design and clear information hierarchy.
- Assisted customers in locating and understanding products, strengthening skills in accessibility and user-centered communication.

Customer Service Associate | IKEA March 2023 - December 2023 | Charlotte, NC

- Assisted customers with order pickup, processing refunds, and resolving disputes related to online orders and inventory discrepancies.
- Collaborated with warehouse and inventory teams to resolve stock discrepancies, gaining exposure to logistics systems and cross-functional workflows.
